

**4. Langkah Keselamatan**  
① Campur krim yang tidak digunakan akan kehilangan kesan pewarnanya. Buang campuran yang tidak digunakan.

**5. Cara Menyimpan**  
① Jauhkan daripada kanak-kanak. Produk ini bahaya jika tertelan.  
② Jauhkan daripada suhu tinggi atau cahaya matahari.  
\* Jangan guna pada kanak-kanak

\* Berhati-hati supaya campuran pewarna produk tidak terkena pakaian, lantai, permaidani atau dinding kerana ia akan menyebabkan kesan kotoran kekal.  
★ Berhati-hati supaya bahan campuran krim tidak terkena pada pakaian, lantai, permaidani atau dinding, kerana ini boleh mengakibatkan kesan kotoran kekal.

\* Sila gunakan dengan berhati-hati dan pastikan sekiranya berlaku sebarang reaksi yang tidak normal pada kulit anda. Sekiranya berlaku, kenal pasti reaksi samaada kemerahan, Bengkak, gatal-gatal, tompek putih atau hitam pada kulit, atau reaksi boleh dilihat dibawah cahaya matahari. Berhenti penggunaan dan rujuk pakar kulit. Sekiranya diteruskan penggunaan, simptom-simptom tersebut akan bertambah teruk.

#### Langkah-langkah Ujian Alahan Kulit

Ujian alahan kulit menunjukkan sama ada anda mempunyai alahan terhadap pewarna rambut. Walaupun anda pernah mewarnakan rambut beberapa kali tanpa ada sebarang tindakbalas, perubahan dalam kondisi badan berkemungkinan mengakibatkan tindakbalas berlaku. Oleh itu, setiap kali sebelum penggunaan, pastikan ujian dilakukan 48 jam sebelum mewarnakan rambut.

**Langkah 1 : Sediakan barang-barang berikut.**  
Sila sediakan sendiri barang-barang ini.  
① Krim 1 ② Krim 2  
③ Swab kapas ④ Pad kapas atau tisu

**Langkah 2 : Sediakan campuran untuk ujian alahan kulit.**

- Buka penutup tiub krim 1, dan cucukkan lubang ke dalam tiub dengan menggunakan muncung di bahagian tengah atas penutup (pastikan anda telah memasukkan muncung dengan cukup dalam). Tekan dengan perlahan, picut keluar sedikit krim sebesar kacang hijau di atas dulang.
- Kemudian picut keluar kandungan yang sama banyak dari tiub krim 2.
- Campur kedua-dua krim dengan kapas.

**Langkah 3 : Sapukan campuran pada bahagian dalam lengkap dan biar selama 48 jam**

- Apabila campuran sudah sedia, ambil dengan menggunakan hujung kapas dan sapukan dalam bentuk lapisan bulat nipis sebesar duit syiling 50 sen pada bahagian dalam lengkap, dan biarkan sehingga kering.
- Biarkan selama 48 jam. Pastikan tempoh 48 jam.
- ★ Bahagian di mana campuran telah disapukan mungkin bertukar ke warna coklat, namun selepas ujian, warna coklat tersebut akan tanggal dalam beberapa hari.
- ★ Berhati-hati supaya tidak membiarkan campuran terkena pada pakaian anda sebelum keriting sepenuhnya.
- ★ Jika campuran yang disapukan tidak kering dalam tempoh 30 minit, dengan perlahan bersihkan lebihan campuran tersebut dengan tisu.
- ★ Untuk memastikan supaya hasil ujian ini tepat, jangan basahkan ataupun garu atau tampal dengan sesuatu kawasan ujian tersebut selama 48 jam. Anda dinasihati supaya tidak mandi pada hari anda melakukan ujian ini. Jika anda mandi, pastikan anda tidak menggosok atau membiasakan kawasan ujian tersebut tersebut.

**Langkah 4 : Perhatikan kawasan ujian, DUA KALI**

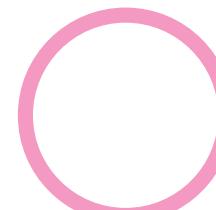

- 1) 30 minit selepas guna
- 2) 48 jam selepas guna

★ Jika mengalami kegatalan, kemerahan, lecuk, kerengsaan atau kulit yang tidak normal di kawasan ujian, jangangosok dengan tangan anda. Bilas serta-merta dengan air dan jangan warnakan rambut anda.

**Langkah 5 : Jika tiada sebarang simptom di alami pada kulit selepas 48 jam, anda boleh mewarnakan rambut anda.**

Jika ujian alahan kulit menunjukkan apa-apa simptom, sila hubungi hotline pertanyaan.

#### Panel ujian alahan kulit

\* Baca arahan dengan teliti sebelum dan semasa menggunakan seperti yang diberitahu.

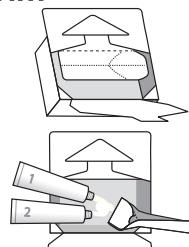

Semuacamur yang telah digunakan perlu dibersihkan setelah ujian alahan dilakukan sebelum warna seterusnya jika produk kekal. Hasil ujian ini boleh digunakan untuk penggunaan seterusnya.

## Cara Penggunaan

Pastikan anda melakukan ujian alahan kulit setiap kali sebelum menggunakan.

### 1. Sediakan campuran krim sebelum mewarna

- ① Campurkan jumlah yang sama krim 1 & 2 ke dalam kotak.

- ② Gaul sebatik dengan sudu kertas.

#### Perhatian!

\* Gunakan campuran krim serta-merta selepas dicampur.

Ia tidak akan berkesan jika ditinggalkan 60 mint atau lebih.

### 2. Sapukan campuran krim pada rambut anda

- ① Gunakan sarung tangan.
- ② Sapukan krim pada rambut anda menggunakan tangan mengikut pilihan anda.

#### Sila dapatkan bahan-bahan aplikasi anda

- ③ Biarkan selama lebih kurang 30 minit. Bersihkan sebarang campuran krim pada kulit anda dengan segera, supaya tidak sukar untuk menghilangkan pewarnaan.

• Warna akhir rambut juga bergantung pada warna rambut sebelum diwarna

Imbas kod QR dan lihat gaya rambut pilihan.

### ■ Mewarna keseluruhan rambut

**Saranan penggunaan : 2-4 Kotak**

- ① Ambil bahagian rambut yang ingin diwarnakan
- ② Sapu dan ratakan krim dengan baik mengikut turutan bahagian.

### ■ Pewarnaan akar rambut

**Saranan penggunaan : 1-2 Kotak**

- ① Asingkan rambut untuk mendedahkan bahagian akar rambut.
- ② Sapukan krim pada akar rambut yang baru tumbuh dengan menggunakan hujung jarinya.

### ■ "Highlight" di belakang telinga

**Saranan penggunaan : 1 Kotak**

- ① Asingkan permukaan rambut dan pisahkan bahagian rambut di belakang telinga.
- ② Sapukan dan ratakan krim.

### ■ "Highlight" dengan gaya Natural

**Saranan penggunaan : 1 Kotak**

- ① Ambil lapisan bermula dari tengah permukaan
- ② Sapu dan ratakan krim dengan jari

### 3. Bilas rambut anda dengan bersih, kemudian selesaikan dengan syampu

- 1.) Selepas itu, biarkan selama 20-30 minit, bilas dengan bersih dengan air suam.
- 2.) Syampu rambut anda dengan bersih untuk kali kedua.

• Berhati-hati agar tidak terkena air ke dalam mata.

★ Keringkan rambut dengan betul selepas mewarna. Sarung bantal mungkin berwarna jika rambut anda masih basah disebabkan oleh air atau cecair rambut. Berhati-hati agar tidak menyakiti kulit kepala atau rambut anda.

### 4. Sapukan krim sekali lagi jika anda mempunyai banyak rambut yang berubah.

#### Amaran

Krim yang telah dibuka dan tidak digunakan akan kehilangan kesan pewarnaan. Semua campuran yang telah digunakan perlu dibersihkan setelah ujian alahan dilakukan sebelum warna seterusnya jika produk kekal. Hasil ujian ini boleh digunakan untuk penggunaan seterusnya.

**Caution**  
**DO NOT USE**  
If you have ever experienced an allergic reaction to a hair colorant product.

- If you have ever experienced an allergic reaction to a hair colorant product
- If you obtained abnormal results from the skin allergy test

Please consult with the following

For inquiries about this product,  
(Monday – Friday, 8:30am – 5:30pm)  
Malaysia, call: 1800 88 4588  
Alternatively, visit <http://web.kao.com/my/liese>

**Risk of allergy due to hair color**

"An allergic reaction" to the product consists of itchiness, swelling, redness or rash found mostly on areas like the scalp, hairline, forehead, face or neck. In some instances, there may only be itchiness. If you do not notice the rash, repeat the use because the symptoms of the rash are mild, and use again after the symptoms are cured, the symptoms will gradually become heavier, and in rare cases, a serious allergic reaction called "anaphylaxis" (whole body urticaria, dyspnea, etc.) may suddenly occur and is dangerous. If you have experienced such rash symptoms, never use it.

**Caution for Use**

**1. DO NOT USE:**

- ① If you have ever experienced an allergic reaction to this or any other hair colorant product.
- ② If you have ever experienced hives, itchiness, rash, or redness, or felt unwell with symptoms such as breathing difficulties or dizziness, either during or just after coloring your hair.
- ③ If you have ever had an abnormal reaction to the skin allergy test.
- ④ If you have sensitive scalp or skin (e.g. during or when recovering from illness; during menstruation or pregnancy).
- ⑤ If you have an inflammation, cut or skin problem on head, face or neck.
- ⑥ If you have ever suffered from kidney diseases, blood disorders or other such medical condition.
- ⑦ If you have symptoms of illness (slight fever, fatigue, palpitations, shortness of breath, tendency toward bruising or bleeding, have heavy or prolonged menstruation or other bleeding).

**2. Before usage:**

- ① Before each use of this product, perform a skin allergy test 2 days (48 hours) in advance.
- The skin allergy test indicates whether you are prone to allergic reactions from hair colorant ingredients. Check the test site twice-once, 30 minutes after applying the test cream mixture and again after 48 hours. Even if you have colored your hair many times before with no reaction, changes in body conditions may cause a reaction to occur. So, perform this test each time before use without fail.
- ② This product only intended for hair on the head. Do not use on anywhere else.
- ③ Do not use on eyelashes or eyebrows as cream may drip into your eyes.
- ④ Do not use immediately after shaving as skin may have small cuts and are prone to irritation.
- ⑤ If you have just permed your hair, allow at least one week of interval before using this product as it may result in hair damage or hair discoloration. Similarly, after hair coloring, at least one week interval should be given before perming to avoid hair damage or hair discoloration.

**3. When coloring your hair:**

- ① Use cream mixture immediately after mixing.
- ② Use in a well-ventilated area.
- ③ Wear the gloves provided.
- ④ Do not wet your hair before product application nor bathe during product application. Perspiration or water droplets may cause cream to get into your eyes.
- ⑤ Avoid getting the cream mixture onto the face or neck. If it happens, wash off immediately with water.
- ⑥ Avoid contact between your eyes and the cream mixture, the rinsing water as it may cause severe pain. In some cases eye damage can occur (e.g. inflammation of the cornea), DO NOT RUB your eyes if cream mixture or its rinsing water comes in contact with them. Rinse eyes immediately with cold or lukewarm water for at least 15 minutes and seek medical attention immediately.
- ⑦ During application, if you experience any skin abnormalities such as rash, redness, inflammation, itching, strong irritation, or if symptoms such as hives, breathing difficulties or dizziness appear, rinse the cream off thoroughly and seek medical attention immediately.
- ⑧ If you experience any abnormalities after application, seek prompt medical attention.

**4. Precautions**

① Unused cream mixture will lose its coloring effects. Discard the unused mixture

**5. Storage Advisory**

① Keep out of reach of children. Product is hazardous if ingested.  
② Store away from high temperatures or direct sunlight.

\* Product not intended for children use.  
★ Be careful not to let product mixture come in contact with clothing, floors, carpets or walls as it will cause permanent staining.  
\* Please be careful about the storage place to prevent accidental ingestion by people with dementia.  
\* Please use with care to see if any abnormalities have occur on your skin. Should this disagree with your skin, should you observe any abnormalities such as redness, swelling, itchiness, irritation, color loss (white spots etc.) and skin darkening during use, or should you observe similar abnormalities in direct sunlight, discontinue use and consult a dermatologist. If you continue to use, symptoms may worsen.

**Skin Allergy Test Procedure**

The Skin Allergy Test indicates whether you are prone to having an allergic reaction to the product. Even if you may have colored your hair many times before experiencing any reaction, changes in body conditions may cause a sudden reaction to occur. So perform the test, without fail each time, 48 hours before use.

**STEP 1 Have the following items ready.**

Please provide these items yourself

- ① Cream 1 ② Cream 2
- ③ Cotton swab ④ Cotton pad or tissue paper

**STEP 2 Prepare the mixture.**

- Remove the cap of Cream 1 tube and pierce a hole in the tube using the spike found in the outside top center of the cap. Ensure that the spike is inserted deep enough to pierce through. Squeeze out a drop of cream about the size of a pea onto the Test panel as follows.
- Squeeze out a similar amount from Cream 2 Tube.
- Mix both drops of cream together with a cotton swab.

**STEP 3 Apply mixture onto inner side of arm and leave for 48 hours.**

- When the test mixture is ready, use the tip of the cotton swab to apply a thin round patch about the size of a \$1 coin on the inner side of your arm and let it dry naturally.
- It is important to leave the spot on for 48 hours.
- ★ The part of your skin which you have applied to may become brown, but after the patch test this will disappear after a few days of normal bathing.
- ★ Be careful to avoid test mixture spot to come in contact with your clothing before it dries completely.
- ★ If the spot does not dry within 30 minutes after application, gently blot excess with a tissue.
- ★ To ensure that the result is accurate please do not moisten, scratch the test area or place any seals over it for 48 hours. It is advisable not to bathe or shower during the test. If you must bathe, make sure you do not get the spot wet.

**STEP 4 Observe test area twice.**

- 1) 30 minutes after application
- 2) 48 hours after application

- ★ If rash, redness, itchiness, blistering, irritation or other skin abnormality occurs, do not rub with your hands. Wash off test mixture immediately and DO NOT use the product.
- ★ If any of the above said reactions are noticed during test period, even if it is before the end of 48 hours, STOP TEST immediately. Wash mixture off and DO NOT use the product.

**STEP 5 If there is no abnormal reaction after 48 hours, proceed to use the product.**

If the Skin Allergy Test results in any abnormalities, please contact our product inquiry hotline.

**Skin allergy Test Panel**

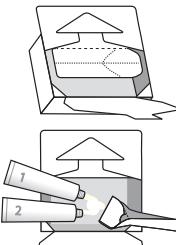

\* Read accompanying instruction carefully before using and use as directed.

All tested solution should be wiped clean as an allergy test is required before the next color if product remains. This panel can be used for the next test.

## HOW TO USE

Be sure to perform a skin allergy test every time before use.  
Read "Skin Allergy Test Procedure" carefully.

### 1. Prepare the cream mixture before coloring

### 2. Mix thoroughly with the paper spoon.

#### Caution!

- \* Make sure cream in box corner is also mixed.
- \* Use cream mixture immediately after mixing.  
Mixture will be less effective after 30 min.

### 2. Apply the cream mixture to your hair

- 1 Put on Gloves.
- 2 Apply the cream to your hair with your hand according to your preference.

#### Please find your application

- 3 Leave on for about 30 minutes.  
Wipe off any cream mixture on your skin soon, otherwise, it will be difficult to remove staining.
- Final color will depend on hair color before coloring
